

Anhui Publishing Group (APG)

Founded in November, 2005, Anhui Publishing Group (APG) is the first Chinese large-scale publishing group that goes for enterprise organizational system reformation while establishing the Group.

Of all APG's 26 subsidiaries, there are 12 wholly owned and holding ones including Time Publishing & Media Co., Ltd., a listed company. The principal business of APG covers publishing, printing, copying, distribution, material supply and operating for books, magazines, electronic AV, on-line and digital publications. At the same time, the Group also operates business including foreign and domestic trade, medicine, smart city construction, public fire safety facility, real estate, and pharmacy.

Since its establishment, its annual revenue, profits and the growth rate of copyright trade have been taking the lead position in the industry for five consecutive years. The Group has been awarded as "Excellent Enterprise of the National Reform of Cultural Administrative System", "Top 30 National Cultural Enterprises", "Top 500 Chinese Enterprises in Service Industry", "Top 100 Enterprises in Anhui Province", and "Key National Cultural Export Company". With a fast growth in terms of profit and scale, APG gains a good reputation and high status in the industry with its high quality products.

Beijing Shouhang IHW Resources Saving Technology Co., Ltd

Beijing Shouhang IHW Resources Saving Technology Co., Ltd is a joint-stock enterprise which is for the purposes of environmental protection, and energy-saving technologies development constantly. It is a A-Share company listed in Shenzhen Stock Exchange (Stock code: 002665), and is a high-tech enterprise that specialized in the services of engineering management research and development, manufacture, sales, erection, commissioning and training etc. for air cooling system of power plants, solar power system, Hydro Technology and waste heat utilization system. Our company were successfully awarded “The Second Prize of National Technical and Technology Progress Award”, “Beijing High-tech Enterprise”“Zhongguancun Science Park Enterprise”, “Beijing Enterprise Technology Center” etc. and dozens of honors.

Company was founded in 2001, headquartered in Beijing, subordinate company include: its energy-saving tianjin branch, west of xinjiang energy co., LTD., its energy-saving solar-thermal technology co., LTD., dunhuang first energy-saving new energy co., LTD., its energy saving (Hong Kong) co., LTD., airport on northeast ji digital technology co., LTD., guangdong power engineering design co., LTD., Beijing Oriental mould co., LTD., etc.

Shouhang’s talents team consists mostly of professor senior engineers and Doctors, who understand business, are adept in management and design, and are proficient in construction. Company's performance over the years of strong growth. By 2015, the company has contracting units more than 140 sets of air cooling system, including 4 units of 1000 mw unit, 24 units (600 mw), 3 units of 480 mw, and 77 units of 300 mw and 40 sets of 300 mw unit below, performance covers 1100 mw to 50 mw unit size of air cooling system, etc. Total installed capacity of more than 50000 mw, a breakthrough in festival 1 billion tons of water. Covering domestic users, datang datang group, huadian power international group, luneng group, shenhua group, Beijing can group, ning electric group, China resources power, guohua electric power, electric power, international trust & investment cast in shaanxi, hubei YiHua, zhongtai chemical and other well-known domestic enterprises in the "three north" area of all kinds of climate and physiognomy conditions for investment project. Products are also exported to the United Kingdom, South Korea, Australia, India, Iran, ivory coast, Pakistan and other countries.

Botou Xingda Motor Dies Co., LTD

Botou Xinda Motor Dies Co., LTD is a professional enterprise in motor dies R&D, manufacturing & stamping parts

The company was established in 1992, consisting of Hefei Fuda, Tianjin Xingda, Jiaohe Xingda, Tianjin Ogitech-Xingda technical service, two R&D centers in Tianjin. BXMD is the largest motor dies manufacturer in China private companies, providing systematic services on motor stamping parts, for domestic and international automakers. Xinda was awarded “the backbone of China automobile dies manufacture companies” by China Mould & Die Industry Association as its first members in 2007.

Business Scope: motor dies, clamping fixture, checking fixture, stamping parts

China Harbour Engineering Company Ltd.

Founded in 1980, China Harbour Engineering Company Ltd. (CHEC) is a subsidiary of China Communications Construction Company Ltd (CCCC), one of the Global Fortune 500 companies. CHEC has been developing and operating the overseas business on behalf of CCCC. Currently, CHEC has more than 70 overseas branch offices or subsidiaries serving clients in over 80 countries around the world. Today, our 10,000 plus employees are undertaking 10 billion USD worth of projects globally.

CHEC is a leading provider of full services in Engineering-Procurement-Construction (EPC), Build-Operate-Transfer (BOT), and Public-Private-Partnership (PPP) for both public and private sectors. Our diverse infrastructure portfolio includes marine engineering, dredging and reclamation, road and bridge, railway, airport, equipment assembly. The Company has abundant expertise and experiences in other industries as well, such as building, municipal works, environmental, hydraulic engineering, power plant and energy, and resource exploration. By virtue of its advantages in technique, equipment, marketing and manpower, CHEC is providing prestigious services globally and becoming a world-renowned brand in the field of engineering.

DALIAN QIANFENG Real Estate Development Co., Ltd.

With the certificate of real estate developing and managing in second grade of natural endowment, DALIAN QIANFENG Real Estate Development Co., Ltd. was established in 2001.

For years, by courtesy of friends from all walks of life with great strength, our company had an increasing social and economic efficiencies, had good reputation and gained good remark and acceptance.

In recent years, we took an original concept and unceasing innovation in estate development to build an excellent brand image and an efficient team. We have a system of specific individual responsibility for chief engineer, chief economist and chief accountant, and also have two management systems in senior appraisal system and marketing planning system.

Our company has several departments such as engineering department, finance department, sales and marketing department, design department, project development department, HR department and etc.

We have developed many projects, such as DALIAN QIANFENG Seascape Garden, QIANFENG Manor, Golden City Park, and Golden City House, with outstanding remarks of their design, quality, function, and conservation.

The tenet of our company's business: Developing the building is creating the brand. "With sincere take a letter, take advantage in order to believe" Serve our customers through our high quality."

Brief Introduction on Shandong Fangyuan Nonferrous Metals Group (Dongying Fangyuan Nonferrous Metals Co., Ltd)

Founded in 1998, Shandong Fangyuan Nonferrous Metals Group is a grouping enterprise integrating scientific research, industry and trade. The Company mainly focuses on production of copper, gold and silver while also working for comprehensive extraction of precious and scarce metals including platinum, palladium, selenium, antimony, bismuth, etc. With total assets of 28.2 billion yuan, the company has almost 3000 employees. As the fifth largest copper producer and one of the top ten gold and silver producers in the country, the company is also ranked among the top one hundred enterprises in Shandong Province and top five hundred all over the nation. In 2014, the copper cathode production volume amounted to 548 thousand tons, the gold 19.6 tons and the silver 376 tons, with the sales income reaching 60.62 billion yuan, 3.82 billion yuan of profit and tax.

■ Devoted to high quality product and trying for the best

The company mainly produces "Lufang" brand high-purity cathode copper, smooth and fine from surface with uniform and compact texture. The impurity in the product is only one third of the standard stipulated by the State. It is a famous brand product in Shandong Province, a national inspection-free product, a registered brand in Shanghai Futures Exchange, Well-know Trademark of China, and continues to be awarded with the Nonferrous Metals Product Quality "Gold Medal". Gold and silver products with "Lufang" mark are "National Class A" products.

■ Boosting the innovation in science and technology, leading the thriving prosperity in the future

The company owns metallurgical technology of proprietary intellectual property right which is called "Oxygen Bottom-blown Smelting Technology for Polymetallic Trapping". The technology has small investment, great environmental protection and low energy consumption, filled the vacancy in nonferrous metals industry both at home and abroad. The overall technical indicators have reached the world advanced level, awarded the "First Prize for Science & Technology in China's Nonferrous metals Industry" and the "First Prize for Progress in Science & Technology in Shandong Province" in succession, listed into "Nonferrous metals industry 'Twelfth Five-Year' development plan" by MIIT (Ministry of Industry and Information Technology of the People's Republic of China, and it also has been recorded in the history as "the world's fourth generation of new copper smelting technology". The company has established the first demonstration production line of Oxygen Bottom-blown technology for copper smelting, leading the development and innovation of oxygen bottom-blown technology for copper smelting, and the demonstration project has been listed national key technology support program, one of the seventeen key scientific and technological programs.

Keeping a foothold on independent innovation and the combination of research and application, the company has constructed independent scientific research platform and transformation system, and accelerated technical R&D and achievements transformation pace. It has successively established strategic cooperation relations with domestic and overseas universities, institutes and enterprises

including Central South University, Northeastern University (NEU), Shenyang Institute of Automation, Chinese Academy of Sciences, The University of Queensland in Australia, and American Purdue University, CODELCO, and HOKO Co., Ltd of Mongolia. In addition, it constructed R&D platforms such as state recognized lab, post-doctoral scientific research station, provincial engineering center and provincial technical center. Moreover, it developed world leading multi-metal (such as copper, gold and silver) comprehensive trapping set technology and equipment. Furthermore, it tackled “new technology for disposing acidic waste-water in flue gas cleansing of heavy metal smelting”, achieved recycling of acidic waste-water, and fundamentally resolved the world-level environmental protection difficulty in nonferrous metal industry.

The company will use market means to promote “Oxygen Bottom-blown technology” as the representative for “Fangyuan Technology” in the whole industry, and was called “Fangyuan Model” by Ministry of Science and Technology. Nowadays, many domestic and overseas enterprises including CODELCO, the greatest corporation in the whole world copper industry, have already applied or prepare to utilize the “ Fangyuan Technology” for utilize it for technical alteration or upgrading.

■Deploying resources within the global range and cooperating with world-top partners with abundant experiences and outstanding reputation

The company has been adhering to the strategy of "going global" and the overall principle of "utilizing two resources and exploring two markets" all the way to expand raw materials supply channels. On one hand, profound cooperative relationship has been established with world famous mining enterprises and trade businesses and initiative has been taken predicated on technical advantage of the capability of bottom-blown technology of handling complex polymetallic mineral materials, thus a strong mineral powder supply network has come into shape in over ten nations and regions in the world to provide sound guarantee for mineral supply; on the other hand, steady copper scrap supply network and bases have been found in America, Europe and Africa in coordination with large copper scrap suppliers in the world, so as domestic bases on the basis of preferential policy of the state in spheres of recycling economy and "urban mine" development ; besides, cooperative relationship has been built up with a great number of large-scale domestic smelting plants, with supply channels of blister copper and anode plate expanded. Therefore, the company has forged a raw material structure pattern like a “three-leg stool” consisting of "concentrate, copper scrap and blister (anode) copper" which can safeguard the raw material supply of the company.

■ Social responsibility, honesty and credit operating with reputation gained from society

The company is a National circular economy standardized pilot unit, high-tech base for National Heavy Non-Ferrous Quality Monitoring and Inspection Center, National international science & technology cooperation base and a research base of Beijing Modern Recycle Economy Research Institute. The company has received National Contract Keeping and Credit First Enterprise, Advanced Enterprise of Nonferrous Metals Industry, Private Science and Technology Development Award, AAA Credit Enterprise from National Nonferrous Sector Evaluation, Demonstrative Enterprise of Shandong Province Recycling Economy, Advanced Enterprise of Cooperation between Schools and Enterprises, Demonstrative Enterprise of Resource recycling, Advanced Enterprise for Safety Production and many other honorary titles.

■ Forging new brilliance in nonferrous industry based upon the Yellow River Delta

In the future, the company is constantly optimizing the production and processing chain for nonferrous metals, improving all aspects of management level of the enterprise to build a world-class copper enterprise.

- To establish “Treat 1.5M t/a Polymetallic Concentrate Project” , Scarce Metal Comprehensive Extraction Program, Nonferrous Metals and Secondary Copper Comprehensive Recycling Project and Technical Equipments Incubation and Production Model Base Project.
- To establish Fangyuan Warehousing Center and Monitoring Terminal for serving high-efficiency eco-economic zone at the Yellow River Delta as well as some north and middle Shandong areas, which will become the major logistic hub connecting Shandong peninsula and Beijing, Tianjin, Hebei and Henan. Therefore, an industrial chain with coordinated development of "material flow, capital flow, information flow and business flow" will be formulated, leading rapid growth and blooming in transportation, processing, financing, insurance and other economic sectors.
- Based on Fangyuan Scientific and Technical Company, Fangyuan Nonferrous Metals Research Center and the company technology center, we will popularize the widespread application of “Fangyuan Technology” to promote technical upgrading and industrial advancement of the world’s nonferrous metals sector.

Guangzhou City Star Logistics Co., LTD

Guangzhou City Star Logistics Co., LTD., founded in 1992 and headquartered in Guangzhou, is a AAAA-class enterprise specialized in comprehensive logistic services covering intercity truck transportation (general goods, valuable goods and overland freight goods), direct money and goods transportation, one-stop air transportation, storage and distribution.

With years of experience in standard management and innovative operation, the company has set its marketing networks in national cities at all levels. The company has established 300 operation outlets and equipped itself with more than 800 own special-purpose vehicle, with the daily goods throughput over 6,000 tons. It has built cooperative relationships with hundred of customer groups and constructed its own warehouse with an area of nearly one million square meters. Its large-scale modern sorting bases are spread in South China, Eastern China and Central China.

The company is rated as the “Pilot Enterprise in Transportation with Dumping Trailers” by National Development and Reform Commission and the Ministry of Communications, the “Demonstration Enterprise in Environment-friendly Transportation” by the World Bank and Guangdong Department of Communications and the “Key Contact Enterprise in Modern Service Industry” by Guangdong Development and Reform Commission. In addition, it is also awarded with many honors such as “National Advanced Enterprise”, “Chinese Famous Brand”, “Top 100 Enterprises of Service Industry in Guangdong” and “Guangdong Credit Logistics Enterprise”.

Guangzhou HuaRong Investment Co.,Ltd.

HUARONG Investment is an investment and management enterprise with diversified operation and the core as the health industry.

At present, HUARONG Investment includes four business engines, which are “plantation, production, and trade and property management”. By virtue of the diversified operation centralized on the health industry, it marches towards being listed in the market in big steps. It has nine affiliated enterprises and a training base. Plantation---Longchuan County NANYAOGU Plantation Co., Ltd., production---Guangxi TAIRONG Medicine Co., Ltd., Zhongshan YINFU Electric Appliance Co., Ltd., trade---Puning TAIRONG Medicine Co., Ltd., Guangdong JINTAIRONG Medicine Co., Ltd., TAIRONG Medicine, Guangzhou AIHANZHEN Trade Co., Ltd., Lanquan Wine Chateau, Eastern Guangdong Flagship Store, property management---Guangzhou YEZHILV Investment Management Co., Ltd. The training base is called LIJIAN Institute. HUARONG Investment Company provides supervision, management and guidance to the above mentioned enterprises.

HUARONG has continuously improved its insights and the capability of grasping the investment opportunities in China, and the capability of optimizing its corporate management, and constructing multiple channels and financing systems to connect the superior capital. Thus, a core team which approves HUARONG culture can be built, and the core competitiveness for its sustainable development can be created and deemed as the foundation of HUARONG’s stable and rapid business growth.

Under the guidance of Pan Qiping, the Chairman of the Board, the company has adhered to the guideline of “operating an enterprise in a standardized and well-grounded way, and with your brainstorm.” In the pursuit of economic development, HUARONG makes endeavors to share its development achievements with its employees and partners, and the society, and takes the initiative to contribute to the society. Also, it commits itself positively into the improvement of the business ecosystem and natural ecosystem in China, and the driven and support of China’s economy and the renaissance of the Chinese culture.

Hebei Jingda Machine Tools Manufacturing Co.,Ltd.

Hebei Jingda Machine Tools Manufacturing Co.,Ltd.,which is located in Hebei Province was founded in 1979 with the former name of Jiaohu Foundry.It has now become a middle-sized local heavy machine building enterprise covering the land of 36 thousand square meters among which there are 20 thousand square meters of construction area.It has more than 400 employees,among which there are 45 specialists of various professions,10 high-title experts and 14 middle-title specialists.We have mainly 48 sets of production equipments,and there are complete equipment sets for lathing,milling,planing,grinding ,drilling and boring.It is equipped with workshops of foundry,machining,and heat processing.Particularly,the foundry branch and machining branch have the advantages of high capacity of foundry and high ability of machining large pieces,which plays a leading role among the local companies in this sector.Our products are exported to more than 20 cities,and autonomous regions all over the world.

Our main products are divided into 3 types::

- 1.Machine tools:Large gantry-type drilling and milling machine(CNC or NC),gantry-type planing machine,end-face milling machine,vertical or horizontal boring and milling machine,mechanical slide platform,machine body and so on.
- 2.Measuring tools and instruments: cast iron surface plate,cast iron angle plate,straight edge,square ruler,square block,v-blocks,precision bench center,granite surface plate and related measuring tools etc.
- 3.Automotive moulds.

The credibility of the House Department Store Group

The credibility of the House Department Store Group, headquartered in Huanghua, Hebei Province, was founded in 1984, is a retail department store chain based joint-stock commercial enterprise groups. Group consists of five subsidiary companies, 18 branches, four stores, located in Cangzhou, Shijiazhuang, Hengshui, Baoding and Shandong and other regions. Business area of 250,000 square meters, more than 1 billion yuan in fixed assets, employees two million people. 2009 operating income of 1.3 billion yuan, taxes of 68 million yuan; 2010 operating income of 1.8 billion yuan, taxes of 84 million yuan.

Group framework is set to:

Parent: Blue House Department Store Group Co., Ltd. Headquarters: Huanghua credibility floor commercial

Branch: Qingxian commercial building credibility, reputation building commercial Botou, Cangzhou reputation building commercial buildings, commercial building credibility Hejian

Subsidiaries:

Zibo Commercial Building Co. credibility include: Huantai reputation building commercial buildings, commercial building credibility Laiwu

House Department Store Co. Ltd., Dongying credit include: kenli credibility floor commercial

Hengshui reputation House Department Store Co. Ltd. include: Zaojiang reputation building commercial buildings, commercial building credibility Qinghe

Baoding reputation House Department Store Co. Ltd. include: Lixian reputation building commercial buildings, commercial building credibility Wangdu

Shijiazhuang reputation House Department Store Co. Ltd. include: Gaocheng reputation building commercial buildings, commercial building Zhaoxian credibility, reputation building commercial Jinju, Xinji credibility floor trader, Shijiazhuang Yuhua credibility floor department store, Shijiazhuang reputation building department store high column

Franchise: Chengde Weichang Manchu and Mongolian Autonomous County of North Yan Mall

Shandong Province YANGXIN Fuyuan commercial limited liability company
Plain County, Shandong Province, Cheng and Commercial Co., Ltd.

After three years of exploration and practice, the credibility of the House to establish a set of effective cultural concept system and management system, forming a unique pattern of private retail, creating a broad social impact, "the credibility of the House phenomenon" . 2007, was elected to the Ministry of Commerce, the country's most influential department store business.

Shijiazhuang subsidiary was established in August 23, 2008, until the end of 2014 has opened six commercial buildings, namely August 23, 2008 Gaocheng store opened; August 28, 2010 Zhaoxian store opened; 2011 August 27 Jinju store opened; September 24, 2011 Xinji store opened; December 28, 2013 Shijiazhuang Yuhua

store opened; Shijiazhuang high column store construction, is expected by the end of November 2014 opening. Since its inception in Shijiazhuang subsidiaries chairman and general manager Zhang Hong Kong subsidiary office in Shijiazhuang, business area of 84,000 square meters, fixed assets 60 million yuan, more than 10,000 employees. 2014 operating income of 1,094,630,000 yuan, taxes of 626.11 million yuan. Various shops unified business scope, including clothing, footwear, food, gold jewelry, cosmetics, electronic products, daily necessities such as hundreds of categories, thousand kinds of commodities.

Building credibility adhering to the "credibility of the floor-based, and earnestly safeguard the interests of consumers and suppliers" business purposes, the implementation of price tag, so that consistent quality and price, maintain fair competition; implementation of "depending on the customer as a friend" marketing method, the customer as friends and family to be treated; Purchasing Guide with a wealth of product knowledge and skilled service skills, sincere satisfaction to help customers to buy goods, forming a "sale of one mind," the unique atmosphere; perfect practice the "Three Guarantees measures" so that customers here Shopping feel comfortable, worry, be happy.

JASONMOULD INDUSTRIAL COMPANY LIMITED

Jasonmould Industrial company limited has been certified with ISO9001-2008 & TS16946 International Quality Certification. According to its past experience, it has established perfect management procedures and a quality guarantee system ; expert technology of mold making and plastic products, advanced equipment for silk-screening, transfer-printing, surface coating, and so on. We have focused on quality, costing, and delivery. Our staff is committed to manufacturing quality products, on time, with competitive prices. Our success has been achieved by a combination of advanced technology, precision equipment, and qualified staff. These elements work together to accomplish our goal: High-quality product delivered on time.

Jiangsu Dongfang Filter Pocket CO., Ltd.

Jiangsu Dongfang Filter Pocket CO., Ltd. is a professional manufacturer in the line of air filtration material. Established in the early 90s, after 20 years of development, we have been a large scale enterprise with 42.685 million RMB capital funds, occupying the building area 38000 square meters, attracting more than 495 staff, owning the property of 108 million RMB. Jiangsu Dongfang Filter Pocket CO., Ltd. owns two affiliations—Yancheng Filter Bag Institute of Technology and Engineering, and Funing Membrane Laminating and Coating Filter Media Co., Ltd. In the mean while , we have 2 additional offices: Fukuoka Office(Japan) and Nanjing Office (China).

Our company attaches great attention to the innovation of technology. In the recent years, we have been cooperating with the universities and research institutes like Donghua University, Southeast University and Jiangsu Environmental Engineering Institute and so forth for the R&D of several new high-tech products, and enjoyed a good reputation from the customers. Our products won the gold medal in the 9th China International Environmental Protection Exhibition. Besides, some of our products have been listed in the “National Torch Plan Project”, the “National Core New Product” and the “Jiangsu High-tech Product” by the National Ministry of Science.

We have passed the ISO9001:2000 quantity system and ISO14001: 2004 environment system attestation years ago, recommended as the “National Model Enterprise” by the Ministry of Agriculture and China Township Enterprise Association, named as the “ National High-tech Enterprise”, “Jiangsu Research Center of Filter Material Engineering Technology”. Plus, our brand “Zhirong” has been awarded as “Jiangsu Famous Brand”.

Our filter series products sell well in more than 30 cities of our domestic market. Meanwhile, we export to countries like United States, Korea, and Italy etc and established long term cooperation relationship with them.

Jiangsu Senze Group

Jiangsu Senze Group is a professional modern air pollution control technology enterprises, which combines scientific research, production, installation and service in one. Business involves a variety of air pollution control projects with a variety of dust flue gas purification equipment and metal structures and non-standard equipment design, manufacturing and service capabilities: governance in a closed submerged arc furnace with a sound technical and leading technology, closed submerged arc furnace technology and silica fume recovery encryption technology to obtain a national patent.

In recent years, our group in the metallurgical, chemical, power, building materials and many other industries contracted more than 80 large-scale environmental improvement projects, has to undertake several large industrial silicon, ferrosilicon or more Ltd 27000KVA more than 30 sets of large industrial silicon, silicon iron furnace flue. Dust purification equipment design, manufacturing, installation engineering tasks. Simultaneously a number of international co-operation projects, has won the majority of users praise, has won the "key environmental protection industry, manufacturing enterprises", "50 key environmental protection projects in China recommended companies", "2010 China's environmental protection equipment manufacturing industry, the brand spectrum of the top ten brands Gold Award", "unit of the World Eminence Chinese Business Association" and so on.

Purpose of visit: Export Import Investment and Cooperation

Business: Dust engineering equipment manufacturing, sales, installation; dust removal system engineering and technical research, design; engineering and construction dust.

Wish to discuss areas: environmental protection, flue gas cleaning, dust treatment
